Credentialing management simplified with Modio Health

Modio helps healthcare organizations cut through red tape so providers can focus on what matters most: patient care. OneView® streamlines operations and practice management with everything you need, nothing you don't. Administrators, credentialing teams, group practices, and individual providers access and share records on a unified platform, dramatically reducing credentialing time and administrative burden.

Our platform integrates with 100+ sources, including NPPES for NPI lookup, FSMB and NURSYS for license verification, OIG and SAM.gov for exclusions, DEA records, LexisNexis data, primary source verification PDFs, and NCCPA.

Secure cloud-based, real-time platform
Rely on a protected, always-updated system—no local installations or lost files.

Remote onboarding
Get your team up and running without ever having to enter the office, with clear communication between your teams.

Virtual Implementations
Migrate remotely to OneView® quickly with custom workflows—no site visits needed.

Rapid data exchange
Replace spreadsheets: Input credentials once, then retrieve or send them to colleagues and external systems whenever needed.

API access and integrations
Connect OneView® with your other tools through our API to keep data in sync and reduce time-entry tasks.

Free virtual trainings
Join our OneView® trainers for biweekly live sessions on product enhancements and practical credentialing tips.

Credentialing management

Simplified with Modio Health

The platform that automates healthcare credentialing

Modio Health transforms healthcare credentials management with OneView®, our secure platform that streamlines provider credentialing for hospitals, credentialing departments, group practices, and individual providers. OneView eliminates credentialing bottlenecks through intelligent automation and real-time compliance monitoring.

Our platform automatically aggregates provider data from NPI registries, DEA databases, FSMB records, state licensing boards, and educational institutions —ensuring your team maintains compliance while your providers focus on patient care.

OneView® features

Compliance reports

Track ABMS, DEA, and state licensure status at a glance with real-time dashboard monitoring.

Provider profiles

Access complete provider credentials and documentation on a single, consolidated dashboard.

Primary source integrations

Real-time data sync from authoritative sources keeps credentials current and verified.

Pre-populated forms and contracts

Eliminate transcription errors and accelerate applications with intelligent form pre-population.

Workflow and task management

Streamline operations with automated task tracking and custom credentialing workflows.

Email notifications

Automated alerts keep providers and managers instantly updated on application status.
